

Milestone XProtect Remote Client & Smart Client

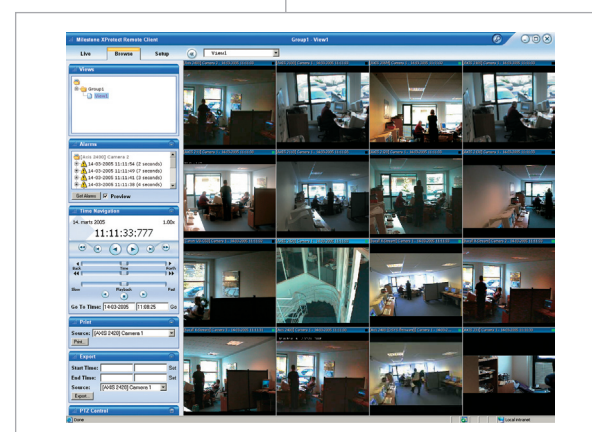

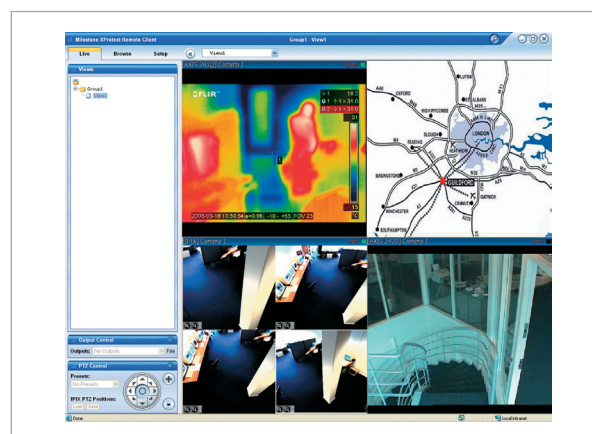

New standards for client architecture and remote access.

Milestone XProtect Enterprise is delivered with both the XProtect Remote Client and the new XProtect Smart Client at no additional cost for unlimited numbers of users. You have the flexibility to choose which one best serves your installation needs. The Remote Client can run from the server or from the user's local

PC, whereas Smart Client is installed directly on the user's PC. The Smart Client offers all of the same advanced functionality as the Remote Client plus exciting new capabilities like Smart Search and manually triggered events. The Remote Client is also delivered with Milestone XProtect Professional.

REMOTE CLIENT FEATURES

- ◆ Live viewing or video playback of 1-16 cameras from the same or different servers simultaneously (XProtect Enterprise only).
- ◆ Advanced video navigation features including fast/slow playback, jump to date/time, single step and video motion search.
- ◆ Make advanced user profiles via the camera-to-user assignment function: the main administrator can set up the access rights for each user determining which cameras and functionality they have access to.
- ◆ Individual views can be user-defined in various layouts: view or playback camera images from multiple servers simultaneously in the same view (XProtect Enterprise only).
- ◆ Shared views can be managed centrally via the server with admin/user rights and user groups.
- ◆ Import static or active HTML maps for fast navigation to cameras and good premise overviews.
- ◆ Control output port relay operation, like control of gates, etc.
- ◆ View alarm summaries remotely.
- ◆ Alarm Preview mini-window lets you see recorded images from each alarm as you scroll down the alarm list.
- ◆ Control your PTZ cameras remotely, also using preset positions.
- ◆ Remote PTZ Point-and-Click control.
- ◆ Remote PTZ zoom to a marked rectangle.
- ◆ IPIX 1x2 or 2x2 'Quad View' making all 360° viewable at once.
- ◆ Optional video compression in streaming from server to client gives better use of bandwidth.
- ◆ Audit log in for Remote Clients on user activity by time, IP address, and cameras.
- ◆ Create AVI files or save JPEG images from multiple cameras simultaneously.
- ◆ Print incident reports with free-text user comments.

View live or recorded video
anytime, from anywhere***

XProtect Smart Client

is future-proof, based on Microsoft .NET technology

INTERFACE FOR TODAY AND TOMORROW

The Milestone XProtect Smart Client is based on .NET, the coming standard for enabling faster and easier integration with other systems and partner plug-ins. With it, you can look forward to realizing the promise of information anytime, anywhere, on any device.

SMART CLIENT FEATURES

XProtect Smart Client includes all the great features of XProtect Remote Client plus more:

- ◆ Smart Search lets you quickly search selected areas of camera images for motion. Within a camera image, you can mark a specific area, multiple areas or overlapping areas for detecting motion sequences. This allows you to quickly identify moved, added or removed objects, like a stolen item.
- ◆ Manually Triggered Events let you generate events by clicking on an Administrator-defined button.
- ◆ Quick overviews of sequences with detected motion.
- ◆ Quick overviews of events/alerts.
- ◆ More features for printing images.
- ◆ Assign keyboard shortcuts to common actions.
- ◆ Assign common actions to joystick buttons.

SETTING INDUSTRY STANDARDS

Milestone Systems is the world market leader for development of open platform IP video surveillance software. The XProtect products offer the flexibility of support for the widest choice of network cameras and video servers connected to a LAN, WAN or the Internet. These include equipment from ACTi, Axis, Canon, Convision, D-Link, FLIR, IPIX, IQinvision, JVC, Mobotix, Panasonic, Pixord, Sony, Sanyo, VCS, Verint, Vivotek, Toshiba.

Besides the independence of multi-hardware support, you get robust performance with simultaneous live image playback and recording, advanced management, flexible scheduling and intelligent functionality.

Milestone solutions are in operation on 100,000 cameras globally, across a wide spectrum of industries from retail, transportation and production, to finance, health, education, government, the military and police. 10,000 customers attest to the proven track record of the robust XProtect products. Milestone Systems are sold through an authorized channel of 170 professional partners in 55 countries.
